

ITERATION 1

1. Customer Meeting Date (For Demo): 14th March 2022
2. In this iteration we have implemented the User Story #5. We have focused on the admin side of the project as of now so that we can move on to the dashboard in the next iteration (this requires implementing the dashboard and the features as requested by the client).

The iteration included the following additional implementations:

- a. HTML/CSS/Bootstrap based home page, edit home page, login, logout, and signup.
 - b. Changing the database from sqlite3 to PostgreSQL
 - c. Deploying on Heroku
3. We will be working to incorporate the following DB Schema for the project.

4. The entire code can be viewed on our GitHub repository and the Heroku deployment can be viewed on the link below. Additional links are also provided below:
 - a. Heroku Web-App: <https://cameron-rv-park.herokuapp.com/>
 - b. GitHub Repository: <https://github.com/ras3701/Cameron-RV-Park>
 - c. Pivotal Tracker: <https://www.pivotaltracker.com/n/projects/2555036>

5. Customer Meeting Minutes:

Date: March 14, 2022

Time: 12 pm

Attendees: Alekhya, Mudit, Rishabh, Manik, Rohan, Mehul Kapadia, Jugal Kapadia

Feedback:

- customer loved how the website is designed: home page content is editable
- customer liked the approach where a superadmin can make any user an admin
- signup page needs to be modified (need to add more fields such as email address, phone number, etc.)
- “Edit Home Page” dashboard should allow admin to add more than 3 images to the carousel
- “Edit Home Page” dashboard should allow admin to add a new section to the home page

Overview:

- changes to the signup page will be pulled into our next sprint
- “Edit Home Page” dashboard feature requests will be part of future work
